**Subject:** RE: Triazoles and Aspergillus

Sure—We know the patient was a man with acute myeloid leukemia and history of stem cell transplant who died of invasive aspergillosis from a triazole-resistant strain of *Aspergillus fumigatus*; the triazole-resistant strain of *A. fumigatus* had the TR34/L98H mutation (which is associated with environmental triazole fungicide use rather than previous patient exposure to antifungals).

We're still trying to learn more details about the patient.

Thanks  
Jeremy

Do you have any information about the death in Pennsylvania?

Thanks,

Susan.

Hi Susan

Forwarding the draft list of research proposals.

Best  
Jeremy
